ADDRESS

District 3 Neighborhood 1 street 17
building 37, 6TH OF OCTOBER CITY,
Giza, Egypt

OBJECTIVE

I am a hard working person my dream is to make a great change in the world. I think it will be a really big step through working with you I am so passionate for machine learning, and am very good in software engineering. I want to help get up that company on it's legs and make a huge change in the world. I am ready to do anything and learn anything to reach my target. I know a startup will need a lot of work to be done and that am willing to do. I am a person who will give a lot of energy and will try his best to be more and more productive to make more time in my day so, if you needed from me 70-80 hours that wouldn't be a problem. Making great things always demand great effort. so, I will give enough energy not only that but, as part of being smart people we should always look for more productive ways in doing things to make more in less time and that what am going to do.

EXPERIENCE

APTWARE , FULL SOFTWARE ENGINEER

Jun 2014 - Jan 2015

- started working in my second year of college
- started my career as a full stack engineer
- developed a website for hotel reservation
- learned laravel
- became a team leader
- developed another couple of websites which didn't see light

OTHER EXPERIENCES

PAYME, FULL STACK SOFTWARE ENGINEER AND TEAM LEADER

Jun 2015 - now

- I learned to be more and more productive
- I learned how to advance myself in something without the supervision of any body cause i was the only developer for about 7 months
- learned aws
- learned linux system administration
- secured the server and application to pass the PCI test and took the PCI certificate
- developed the riseUpSummit 2016 in Egypt reservation booth system
- became a team leader and taught new developers code ethics and how to make a good readable code.
- leaded and developed on a website for online shopping and event reservation called paymeStore <https://paymestore.co/>
- learned node js and angular js 2
- I was supervising the learning process of all the new interns to teach them how coding ethics and other coding conventions which keep things in the best possible way.
- now leading a bigger team of developers to make a huge banking system. which is developed in node js using sails framework in backend and frontend using angular js 2.

COURSERA DOWNLOADER

- it's a small script to download cousera videos from the week link which made in python using selenium webdriver.
<https://github.com/abdoolly/Coursera-downloader>

SMALL INFORMATION RETRIEVAL SYSTEM

- Just a project in college very small simulation for an information retrieval system which I have developed in Python.
<https://bitbucket.org/elgenius/ir-tasks/src>

SKILLS

- PHP
- Python
- Nodejs
- Angular2
- MYSQL
- MSSQL
- AWS (amazon web services)
- Linux System Administration
- HTML
- CSS
- JQuery
- Laravel (php framework)
- Sails.js (node.js framework)
- Adonis.js (node.js framework)
- Java
- Android
- OOP (Object oriented programming)

SOFT SKILLS

- I have experience in leading teams.
- I like to help others because I believe that knowledge should always be shared.
- I have worked in startups so, I know how much effort a startup would need, and I know that each person in a startup could do one or many things whatever needed to get that company on its legs.
- I know how to collaborate with other team members positively
- I like learning so much and am always ready to know more and get advanced more and more. Science and knowledge is my passion.

LANGUAGE SKILLS

- Arabic Native language
- English very good in writing and in speaking.
